

## Los Angeles Continuum of Care CES Triage Tool Score Revision Worksheet

**Directions:** For each category where the score is not reflective of the client's vulnerability, indicate the original score as self-reported and the revised score. Provide clear, specific rationale for the adjustment. You do not need to attach medical, court, or other records as "proof", but note if they exist. Tally the total at the bottom of each column. Note that some categories are specific to the VI-FSPDAT. Program Manager/Director must review and sign. Email to population appropriate SPA Matcher upon completion. This document can be found in LAHSA's Document Library. [www.lahsa.org/documents](http://www.lahsa.org/documents).

<b>Client Name:</b>				<b>HMIS:</b>
<b>Person Completing Form:</b>		<b>Organization:</b>		<b>Date:</b>
