COORDINATED ENTRY SYSTEM (CES)

The Coordinated Entry System (CES) for Single Adults, Youth, and Families coordinates supportive services and housing resources across Los Angeles County, to form a collaborative, no-wrong door network that connects homeless individuals and households to services and housing.

CES:

- Creates many “front doors,” to the homeless services delivery system, making all participating providers a point of access
- Lifts the burden of navigating a complex maze of resources from the person experiencing homelessness by providing someone to help navigate the housing process
- Encourages resource coordination among service providers so that people receive the right type and level of services and housing supports for their needs
- Ensures strategic use of limited resources
- Distributes resources more equitably across the county

ELIGIBILITY REQUIREMENTS

To be eligible for services through the Coordinated Entry System (CES) each population has specific requirements:

ADULTS:

- Must be an individual over the age of 18
- Experiencing homelessness in Los Angeles County

YOUTH:

- Must be between the ages of 16-24
- Experiencing homelessness or housing instability in Los Angeles County

FAMILIES:

- Household with minor child
- Experiencing homelessness or housing instability in Los Angeles County

Core Components of the Coordinated Entry System

The Coordinated Entry System (CES) for Single Adults, Youth, and Families is built on a set of common components:

COORDINATION: Through regional and county-wide collaboration, CES maximizes the efficiency and effectiveness of resources, creating an integrated and sustainable response to homelessness.

ENTRY POINT: There is no wrong door to the system regardless of population or point of entry. Outreach teams, crisis housing, and access centers can all serve as entry points.

COMMON APPROACH: All services are person-centered, focused on the goal of permanent housing, and place minimal requirements on the participant.

ASSESSMENT: Population-appropriate questionnaires are used to triage a person's needs in order to identify the services and housing that may be the best fit.

INFORMATION SHARING: LAHSA's Homeless Management Information System (HMIS) database and regional collaborative meetings are used to eliminate duplication of services and coordinate resources.

HOUSING NAVIGATION: Individuals/households are provided assistance in navigating the system toward their housing goals.

LINKAGE: Individuals/households are linked, or “matched,” to the best suited services and housing to address their unique needs.

PRIORITIZATION: When housing resources are limited, individuals/households with the most severe needs are prioritized for the services and housing.

HOUSING STABILIZATION & RETENTION: Individuals/households receive short-term or indefinite supportive services to ensure experiences of homelessness rare, brief, and non-reoccurring.

System Leadership

LAHSA provides funding, program design, outcomes assessment and technical assistance is provided to more than 100 non-profit partner agencies. These agencies provide a variety of programs ranging from outreach, access centers, emergency shelters, bridge housing, transitional and permanent housing, and prevention, along with the supportive services, skills, and tools necessary to attain a stable housing environment.

Programs funded through LAHSA also address homeless-related issues, including domestic violence, mental illness, substance abuse, job training, family strengthening, mainstream benefits enrollment and, most importantly, supportive short and long-term housing.

LAHSA is governed by a 10-member commission, half appointed by the County Board of Supervisors, and half appointed by the Mayor with approval by the City Council. LAHSA regularly convenes and engages in community- and system-level coordination, ranging from the Service Planning Area quarterly meetings to the newly formed Regional Homelessness Advisory Council, with representation from service providers and people with lived experience. Coordination at all levels emphasizes the continued growth and improvement of the Coordinated Entry System.
